INTRODUCTION

The Occupational Employment Statistics (OES) program is a cooperative effort of the U.S. Bureau of Labor Statistics (BLS) and the Office of Occupational and Labor Market Information (OOLMI) in the Delaware Department of Labor. As outlined in more detail below, BLS developed the procedures and methodology, while OOLMI conducts the survey and tabulates the responses. A software program developed by the North Carolina State Employment Security Commission is used to produce the wage and employment estimates. This means that these estimates are not official BLS estimates, but in most cases they are identical to the official BLS estimates. When they differ, it is by miniscule amounts. We do not use the official BLS estimates because they are not provided for Sussex or New Castle Counties, only Kent County (because it is a single-county metropolitan statistical area).

The OES program has ordinarily used three years of survey data, in order to increase reliability. Beginning in 2003, data collection was done twice yearly, with half the sample surveyed in the spring and half in the fall. Wage estimates are now updated once per year, after the results from the spring survey are available. The estimates in this publication were derived from surveys conducted from the fall of 2010 through the spring of 2013. Data from years prior to 2013 were updated to expected 2013 values using national cost index factors.

The survey universe is all employers covered by the state Unemployment Insurance program, both private and public. This covers about 92 percent of the state's workers. Self-employed, some non-profit organizations, and most agricultural employees are excluded. All establishments (units) with 250 or more employees are automatically included in the survey, while those with fewer

employees are randomly sampled for inclusion in the survey. The smallest units have the lowest probability of selection. Details are provided in the table below. Only data from the fall panel of surveys in 2010 and spring panel in 2013 are included in the 2013 wage estimates, which is why they are approximately half the size of the other years, which include both spring and fall panels.

Year	Survey Universe		Survey Sample		Usable Response	
	Units	Employment	Units	Employment	Units	Employment
2010	28,495	399,568	761	53,024	563	39,337
2011	27,938	402,865	1,519	87,155	1,164	67,347
2012	27,797	405,253	1,529	100,868	1,162	75,673
2013	28,213	413,409	746	36,522	559	27,445

Response rates averaged 75 percent over the four years of the survey. Non-responding units have data imputed to them by means of a hot-deck "nearest neighbor" technique. This method finds the responding establishment (donor) which most closely resembles the non-responding establishment, based on industry, size class, and area. The donor's data are then imputed to the non-responding unit. Donors are used only once.

Occupations are classified using the Standard Occupational Classification (SOC) system, which consists of 23 major groups, 97 minor groups, 461 broad occupations, and 840 detailed occupations. Estimates at the major group and detailed occupation levels are included in this publication. More information regarding the SOC system and occupational definitions can be found on the BLS website, <http://www.bls.gov/soc>.

Employers are not asked to supply exact wage rates for their employees. They are requested to indicate how many of their workers within each occupation are earning wages within each of the 12 ranges listed below. Conversion between hourly and annual wages is based on a 40 hour week, 52 week year (2,080 hours per year). Some occupations, for instance teachers, typically work a different schedule. Only annual wages are reported for these occupations. In the wage tables, these are printed in **bold** type. The table below shows the wage ranges used in the 2013 survey.

Range	Hourly Wage	Annual Wage
A	Under \$9.25	Under \$19,240
B	\$9.25 to \$11.49	\$19,240 to \$23,919
C	\$11.50 to \$14.49	\$23,920 to \$30,159
D	\$14.50 to \$18.24	\$30,160 to \$37,959
E	\$18.25 to \$22.74	\$37,960 to \$47,319
F	\$22.75 to \$28.74	\$47,320 to \$59,799
G	\$28.75 to \$35.99	\$59,800 to \$74,879
H	\$36.00 to \$45.24	\$74,880 to \$94,119
I	\$45.25 to \$56.99	\$94,120 to \$118,559
J	\$57.00 to \$71.49	\$118,560 to \$148,719
K	\$71.50 to \$89.99	\$148,720 to \$187,199
L	\$90.00 and over	\$187,200 and over

Wages include base rate, cost-of-living allowances, hazardous duty pay, incentive pay (including commissions, piece rates, and production bonuses), tips, longevity pay, on-call pay, and portal-to-portal pay. Not included are back pay, overtime pay, severance pay, shift differentials, premium pay for holidays or weekends, meal and lodging

allowances, uniform allowances, non-production bonuses, profit sharing distributions, or stock bonuses.

Although a wide variety of statistics are estimated from the raw data, we publish only five: the employment level (**EMPL**) for all employers in the area (state or county), including those not in the survey; the mean (average) wage (**MEAN**); the median wage (**MEDIAN**), which half the workers in an occupation make less than, and the other half more than; and entry-level (**ENTRY**) and experienced (**EXP**) wage rates. **NA** in the employment field means that the employment estimate does not meet publishability standards, but the wage estimates do. **N/A** in one of the wage fields signifies that a large portion of the responses are in the highest, unbounded wage category and a valid wage estimate is not possible. When all the wage estimates for an occupation do not meet standards, no estimates for the occupation are published.

To determine entry and experienced wage rates, an occupation's wage distribution is divided into thirds. The mean of the lowest third is the entry-level wage rate. The mean of the highest two-thirds is the experienced wage rate. It is important to note that employers are not requested to supply information on their workers' amount of experience.

ACKNOWLEDGEMENTS

This report uses the data derived from the Occupational Employment Statistics program. The data were gathered and analyzed by Joylynn Munn, Mark Wallner and Holly Firlein. Kim Johnstone created the layout of the publication.

We would like to express our appreciation to all of the employers who participated in the survey; without their support, this publication would not be possible.

If you need additional information about this or other publications, contact our office at:
