INTRODUCTION

The Occupational Employment Statistics (OES) program is a cooperative effort of the U.S. Bureau of Labor Statistics (BLS) and the Office of Occupational and Labor Market Information (OOLMI) in the Delaware Department of Labor. As outlined in more detail below, BLS developed the procedures and methodology, while OOLMI conducts the survey and tabulates the responses. A software program developed by the North Carolina State Employment Security Commission is used to produce the wage and employment estimates. This means that these estimates are not official BLS estimates, but in most cases they are identical to the official BLS estimates. When they differ, it is by miniscule amounts. We do not use the official BLS estimates because they are not provided for Sussex or New Castle Counties, only Kent County (because it is a single-county metropolitan statistical area).

The OES program has ordinarily used three years of survey data, in order to increase reliability. Beginning in 2003, data collection was done twice per year, with half the sample surveyed in the spring and half in the fall. Wage estimates are now updated once per year, after the results from the

spring survey are available. The estimates in this publication were derived from surveys conducted from the fall of 2011 through the spring of 2014. Data from years prior to 2014 were updated to expected 2014 values using national cost index factors.

The survey universe is all employers covered by the state Unemployment Insurance program, both private and public. This covers about 92 percent of the state’s workers. Self-employed, some non-profit organizations, and most agricultural employees are excluded. All establishments (units) with 250 or more employees are automatically included in the survey, while those with fewer employees are randomly sampled for inclusion in the survey. The smallest units have the lowest probability of selection. Details are provided in the table below. Only data from the fall panel of surveys in 2011 and spring panel in 2014 are included in the 2014 wage estimates, which is why they are approximately half the size of the other years, which include both spring and fall panels.

Response rates averaged 75 percent over the four years of the survey. Non-responding units have data imputed to them by means of a hot-deck “nearest neighbor” technique. This method finds the responding establishment (donor) which most closely resembles the non-responding establishment, based on industry, size class, and area. The donor’s data are then imputed to the non-responding unit.

Occupations are classified using the Standard Occupational Classification (SOC) system, which consists of 22 major groups, 97 minor groups, 461 broad occupations, and 840 detailed occupations. Estimates at the major group and detailed occupation levels are included in this publication. More information regarding the SOC system and occupational definitions can be found on the BLS website, <http://www.bls.gov/soc>.

Year	Survey Universe		Survey Sample		Usable Response	
	Units	Employment	Units	Employment	Units	Employment
2011	27,938	402,865	758	47,318	577	38,730
2012	27,797	405,253	1,528	100,803	1,161	75,608
2013	28,213	413,409	1,517	93,123	1,165	68,032
2014	29,858	425,502	753	38,519	584	25,066

Employers are not asked to supply exact wage rates for their employees. They are requested to indicate how many of their workers within each occupation are earning wages within each of the 12 ranges listed below. Conversion between hourly and annual wages is based on a 40 hour week, 52 week year (2,080 hours per year). Some occupations, for instance teachers, typically

Range	Hourly Wage	Annual Wage
A	Under \$9.25	Under \$19,240
B	\$9.25 to \$11.74	\$19,240 to \$24,439
C	\$11.75 to \$14.74	\$24,440 to \$30,679
D	\$14.75 to \$18.74	\$30,680 to \$38,999
E	\$18.75 to \$23.99	\$39,000 to \$49,919
F	\$24.00 to \$30.24	\$49,920 to \$62,919
G	\$30.25 to \$38.49	\$62,920 to \$80,079
H	\$38.50 to \$48.99	\$80,080 to \$101,919
I	\$49.00 to \$61.99	\$101,920 to \$128,959
J	\$62.00 to \$78.74	\$128,960 to \$163,799
K	\$78.75 to \$99.99	\$163,800 to \$207,999
L	\$100.00 and over	\$208,000 and over

work a different schedule. Only annual wages are reported for these occupations. In the wage tables, these are printed in **bold** type. The table above shows the wage ranges used in the 2014 survey.

Wages include base rate, cost-of-living allowances, hazardous duty pay, incentive

pay (including commissions, piece rates, and production bonuses), tips, longevity pay, on-call pay, and portal-to-portal pay. Not included are back pay, overtime pay, severance pay, shift differentials, premium pay for holidays or weekends, meal and lodging allowances, uniform allowances, non-production bonuses, profit sharing distributions, or stock bonuses.

Although a wide variety of statistics are estimated from the raw data, we publish only five: the employment level (**EMPL**) for all employers in the area (state or county), including those not in the survey; the mean (average) wage (**MEAN**); the median wage (**MEDIAN**), which half the workers in an occupation make less than, and the other half more than; and entry-level (**ENTRY**) and experienced (**EXP**) wage rates. **NA** in the employment field means that the employment estimate does not meet publishability standards, but the wage estimates do. **N/A** in one of the wage fields signifies that a large portion of the responses are in the highest, unbounded wage category and a valid wage estimate is

not possible. When all the wage estimates for an occupation do not meet standards, no estimates for the occupation are published.

To determine entry and experienced wage rates, an occupation's wage distribution is divided into thirds. The mean of the lowest third is the entry-level wage rate. The mean of the highest two-thirds is the experienced wage rate. It is important to note that employers are not requested to supply information on their workers' amount of experience.

The image shows a sample of an Occupational Employment Report form. The header includes the title 'OCCUPATIONAL EMPLOYMENT REPORT' and 'In Cooperation with the U.S. Department of Labor'. Below the header, there are instructions for employers and a section for providing company information. The main part of the form is a table with columns for occupation codes (A through L) and rows for different wage categories (A through L). The table contains numerical data representing the number of employees in each category. At the bottom of the table, there are summary fields for 'Total Employment' and 'Total Wages'.

ACKNOWLEDGEMENTS

This report uses the data derived from the Occupational Employment Statistics (OES) program. The data were gathered and analyzed by our OES team:

Kim Johnstone, *Labor Market Information Supervisor*

Joylynn Munn, *Senior Labor Market Analyst*

Mark Wallner, *Labor Market Analyst*

Michelle Thompson, *Labor Market Analyst*

Kristie Manley, *Editor & Production Coordinator*, created the layout of the publication.

We would like to express our appreciation to all of the employers who participated in the survey; without their support, this publication would not be possible. If you need additional information about this or other publications, contact our office at:

Delaware Department of Labor
Office of Occupational & Labor Market Information
